1 Introduction

The dashboards project is a project at FHI concerned with running automated analyses on data.

In principle, the dashboards project is split up into three parts:

1. The overarching infrastructure (i.e. Docker containers, continuous integration, etc.)
2. The executable for each automated analysis
3. The R package for each automated analysis

2 Literature

Here is a review of existing methods.

3 Methods

We describe our methods in this chapter.

4 Applications

Some *significant* applications are demonstrated in this chapter.

4.1 Example one

4.2 Example two

5 Final Words

We have finished a nice book.
